Activity Title: Writing a Research Proposal
Learning Target: To write a research proposal
References: *(Author, Title, Pages)* J.L.A. Soria, CVIF Learning Activities

A research proposal is a document that describes what topic you plan to investigate, why your study is important, and how you will conduct your study. The main goal of a research proposal is to demonstrate that your project is interesting and worth pursuing to a funding agency, educational institution, or supervisor. Most proposals contain the following basic elements:

1. **Title page**
   Contains proposed title of the project, name of proponents, name of supervisor, department, and institution.
2. **Introduction**
   Contains background and context of the topic, research questions, and significance of the study.
3. **Literature review**
   Review LAS 4 and PT1 in your Research Project.
4. **Research design (Methods and Databases)**
   Contains objectives, overall approach and practical steps needed to achieve your objectives and address your research questions.
5. **Timeline and Budget**
   Contains the proposed timeline (how long it will take) and budget (how much it will cost) to demonstrate that your project is feasible to implement.
6. **Reference list**

Instructions:

1. Compile all the necessary components from your previous outputs (i.e., exercises and performance tasks) in Practical Research 2 and Research Project on a single Word document. Use A4 paper size, sans serif font 12, and 1.5 line spacing.
2. Create your proposed timeline and budget.
3. Submit the Research Proposal to your research adviser online.
